EDUCATION

Florida State University

Aug 2022 – May 2026

Bachelor of Science in Computer Science, Minor in Mathematics and Physics

Tallahassee, FL

- GPA: 3.6/4.0 | Relevant Coursework: Data Structures, Algorithms & Generic Programming I & II, Discrete Math, Computer Organization, Operating Systems, Parallel & Distributed Systems, Computer Forensics

EXPERIENCE

Software Engineering Intern

Aug 2025 – Apr 2026

Florida State University Internal Services

Tallahassee, FL

- Accelerated the production timeline by **15%** by authoring and merging **10** pull requests for critical feature updates and bug fixes, consistently delivering ahead of sprint deadlines.
- Collaborated with back-end developers to improve the faculty experience using the high-performance computing scheduler, reducing average task submission time and streamlining workflow efficiency.
- Designed and implemented a responsive front-end dashboard surfacing real-time job queue metrics, decreasing average faculty support requests by **20%** while improving overall system transparency and usability.

Software Engineering Intern

May 2025 – Aug 2025

Pasco County Government

New Port Richey, FL

- Developed and deployed two full-stack internal applications using a **.NET** REST API and **Nuxt.js/Vue.js**, streamlining county-wide data entry workflows for the Biological and Risk Management teams.
- Improved on-time sprint delivery from **60%** to **95%** by embedding Agile principles for requirements refinement and backlog management, ensuring alignment with stakeholder needs and project deadlines.
- Wrote comprehensive unit and integration tests achieving **85%+** code coverage, reducing post-release defects and improving application reliability across both deployed production systems.

Research Assistant

Sept 2023 – May 2025

Florida State University

Tallahassee, FL

- Achieved a **15%** performance increase in complex material simulations by implementing a custom Density Functional Theory (DFT) program leveraging Rutgers' DFTpy framework on HPC clusters.
- Presented research findings at the undergraduate research symposium to an audience of over **300** students, faculty, and industry professionals, receiving recognition for technical depth and clarity.

PROJECTS

LoL Companion | *Next.js, TypeScript, Python, FastMCP, Anthropic SDK*

- Built a real-time League of Legends chatbot grounded in live Riot API data, using a decentralized MCP architecture where a Python FastMCP server exposes champion and live-match tools consumed by a Claude tool-use loop in a Next.js streaming client.
- Deployed both services to Render with a one-click Blueprint, implementing bearer-token auth, TTL-cached Data Dragon lookups, SSE streaming, and a pre-warm strategy to eliminate cold-start latency on free-tier infrastructure.

Peep Companion | *Electron, React, Vite, JavaScript*

- Built a full-stack Windows desktop application combining a habit tracker, gacha monster-catcher, and procedurally-generated turn-based roguelite dungeon, featuring automated CI/CD releases via GitHub Actions and a self-updating installer distributed to end users.
- Implemented a turn-based combat engine alongside a procedural node-map generator inspired by Slay the Spire

LEADERSHIP / EXTRACURRICULAR

Internal Vice President

May 2025 – May 2026

Lambda Phi Epsilon

Tallahassee, FL

- Led chapter development initiatives for a **30+** member organization, including the “Brotherhood Health Index” and “Personal Excellence Program.”

Secretary

Aug 2024 – May 2026

Asian American Student Union

Tallahassee, FL

- Expanded membership by **100+** through culturally relevant events and workshops supporting FSU's growing Asian community and fostering an inclusive campus environment.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, C#

Frameworks/Tools: React, Node.js, Flask, Vue.js/Nuxt.js, .NET, RESTful APIs, Git, Docker, GCP

Libraries: pandas, NumPy, Matplotlib, SciPy
